NEW SOUTHERN INDUSTRIES.

Enterprises Established During the Second Quarter of the Present Year. CHATTANOOGA, TENN., June 27.-The trades man's report of new industries established in the southern states during the second quarter second quarter in '90 of 1,350, and the second

quarter of '89 of 558.

The tradesman says: While the number of new industries established for the second quarter of this year is not up to that of the corresponding period of '90, still the industrial interests of this section are in a very healthful condition and a noticeable feature for the past three months has been the amount of capital invested in the enterprises indicative that the opment exceptional in its nature and characterized in many instances by want of knowledge of the needs of full underknowledge of the needs of full under-standing of the resources or that sec-tion. When the recent stringency in the money market is taken into consideration the industrial activity in the south for the past quarter is very gratifying and justifies the as-sertion that in no section of the country are the industrial interests in a more healthful con-dition than in the southern states.

NEW ENTERPRISES. During the quarter ending July 1 there were established in the southern states 4 agricultural implement works, 4 barrel factories. 3 boot and shoe factories, I brewery and 39 brick works, Virginia leading with 7, Alabama, 6; Georgia, Kentucky and South Carolina each having 4 to their credit and nearly all of the southern states contributing 1 or 2 to make up the total; 62 large development and invariant contributing 1 or 2 to make up the total; 62 large development and improvement companies have been organized during the quarter. Tennessee leading with 12: Virginia, 10; South Carolina, 8; North Carolina, 7, and the baiance being evenly distributed in the other states. Twentynine electric light companies have been organized against 49 for the corresponding quarter of last year; 18 flour and grist mills have been established; 47 foundries and machine shops, against 70 for the corresponding quarter of '50, 8 furnace companies have been organized, 9 gas works companies, 16 ice works and 57 mining and quarrying companies have been organized; 23 natural gas and oil companies have been organized during the past panies have been organized during the past quarter, which indicates the marked interest that is being attracted to this industry in the south. Twenty-three oil mills have been crected and thirty-seven phosphate companies

have been organized.

The extensive deposits of phosphate that have recently been discovered in Florida have given a great impetus to the phosphate industry in the south and a large amount of capital has been invested in the development of these lands in the past six months, in Florida alone there having been thrry-two phosphate companies organized in the past quarter, two in North Carolina, two in Virginia and one in West Virginia. One hundred and sixteen railroad companies the past special statement of the control of the contr panies have been chartered, three rolling mills erected and thirty-eight street and electric railway companies have been in-corporated. Four tanneries have been erected during the past quarter, 21 water works and 34 cotton and woolen mills have been estab-lished, 9 in North Carolina, 6 in South Carolina, 5 in Georgia, 4 in Alabama and the balance distributed among the other southern states. One hundred and fifty wood-working establish-ments have been erected against 225 of the corresponding quarter of last year.

The establishment of new wood-working es-

tablishments in the south has been especially active and a large number of fully equipped plants have been erected, and the splendid imber resources of this section are in a fair way to be thoroughly developed. The num-ber of wood-working plants established for the quarter exceeds that of any other industry, and with the 125 miscellaneous plants estab-lished during the quarter brings the total up to 892, which will certainly be a gratifying showing to all who are interested in the industrial development of the south.

FINANCIAL AND COMMERCIAL. New York Stock Market.

The following are the opening and closing prices the New York Stock Market, as reported by speciwire to Corson and Miscartney, 1410 F street.

Mr. Henry Clews in his Weekly Financial Review, issued today, says: "Considerable surprise is felt at the continued exports of gold, though they are on a reduced scale. It is inconceivable that after the extraordinary amount of cash liquidations this country has lately made there can be still outstanding lately made there can be still outstanding against us an adverse foreign balance. We must therefore regard the continued shipments as due entirely to special causes. The principal cause appears to be that while there is an abundance of exchange being made to exchange the principal causes are requirements for remitmeet all necessary requirements for remit-tances, yet a considerable portion of the bills are unavailable in consequence of the credit of the payers having been unfavorably affected by the prevailing financial distrust in Great Britain and on the continent. This causes a scarcity of negotiable exchange, and the result is that we are remitting gold at a time when the balance of our account with the rest of the world is in our favor. While this causes an unsettling drain upon our cash resources there is the satisfaction that it correspond ingly augments the amount of gold to be re-turned hither at a later stage.

"Taking the situation as a whole I regard it

as favorable to an ultimately higher range of prices, but at the same time the immediate future seems to warrant nothing beyond mod-erate purchases on the raids for small profits." Washington Stock Exchange.
